

EU-Trinidad & Tobago partnership

September 2025

Green & Resilient Economy

- Delivering policies and frameworks that are conducive to the green transition
- Installing 18 solar energy systems in public utilities, remote communities, and the international airport
- Assessing the potential of areas ideal for wind energy and helping unlock investments
- Investing in and helping design competitive renewable energy projects
- Introducing green hydrogen technology with a new clean hydrogen facility

Digital

- Supporting the long-term expansion of a tier 4 data centre
- Developing a unique national e-identifier to improve the delivery of public services
- Supporting national data protection policies, cybersecurity, and good data governance
- Facilitating access and use of the EU's Copernicus and Galileo satellite services for disaster management, environmental impact, and more
- Developing secure and accessible open-source solutions for government services

* This domain is outside Global Gateway but complementing engagement under it.

These outputs provide an overview of the main domains of actions of the EU in the partner country, pursuing a Team Europe approach.
