

EU-Grenada partnership

September 2025

Renewable Energy

- Fostering investments in solar, wind, geothermal and green hydrogen technology
- Reducing the chronic water shortages and improving wastewater systems
- Climate Finance: mitigating or adapting to the impacts of climate change (green finance and sustainable finance)
- Supporting Caribbean biodiversity and fighting ocean pollution

Health

Supporting health systems resilience and the digital transformation of health facilities.

Transport

Improve maritime connectivity in the Caribbean to foster regional integration, economic growth, and food security.

Climate and Energy

Turn Sargassum algae from a threat to an economic opportunity (e.g. biofuel, water purification, agriculture).

* This domain is outside Global Gateway but complementing engagement under it.

These outputs provide an overview of the main domains of actions of the EU in the partner country, pursuing a Team Europe approach.

The boundaries and names shown and the designations used on this map do not imply official endorsement or acceptance by the European Union.
