RECOMMENDATIONS OF THE EVALUATION OF EU SUPPORT TO SUSTAINABLE AGRI-FOOD SYSTEMS IN PARTNER COUNTRIES (2014 – 2020)

1. ADOPT A COMMON FRAMEWORK TO FOSTER A ‘ONE EU’ APPROACH TO SUSTAINABLE AGRI-FOOD SYSTEMS

1.1 Develop clearer overarching ‘rules of engagement’ for European actors in partnerships supporting SAFS governance at all levels

SELECTED FINDINGS AND LESSONS

- Diversity in EU Member States approaches to SAFS was an asset when it led to synergies and complementarities. But incoherences in approaches have led to inefficiencies and missed opportunities for SAFS transformation.
- SAFS-related European policies, regulations, programming, and funding of research and innovation are overly fragmented.
- Inter-DG coordination is weak, and human resource constraints limit INTPA’s effective participation.
- Rome-Based agencies have remained implementing partners rather than strategic partners.

ACTION POINTS

- Develop a common framework for external action that lays out ambitions and sets core targets and indicators.
- Facilitate EU-wide agreement on principles for engaging in SAFS-related partnerships.
- Review and improve the incentives for increased inter-service and multi-agency collaboration.

1.2 Anchor external action support to SAFS in long-term EU-country partnership agendas

SELECTED FINDINGS AND LESSONS

- Aligning SAFS support with broader agendas helps gain political traction.
- Political commitment, ownership and leadership are important determinants for the success of policy dialogues aiming at agri-food system transformation.
- Effective policy dialogue and partnerships strengthen political commitment to SAFS.

ACTION POINTS

- Identify shared agendas with partner countries and strategic partners on which to focus external action support.
- Ensure the full engagement of national agrifood system stakeholders (government, private sector and civil society) during the design and implementation of country-level strategies.
- Integrate support to SAFS in intersectoral policy dialogue and relevant Team Europe approaches.

1.3 Maintain a focus on enabling the most vulnerable food system actors to play an active role in SAFS transformation at country and regional level

SELECTED FINDINGS AND LESSONS

- The EU has invested in partnerships with a wide range of agri-food system actors applying context-specific and multi-stranded approaches.
- EU support has concentrated at the producers’ end of food value chains.
- Social protection measures are key to enhance sustainability, inclusiveness and the resilience of food systems.

ACTION POINTS

- Strengthen upward, downward, and horizontal agri-food system linkages.
- Strengthen support for food processors and MSME’s.
- Strengthen social protection mechanisms.

“Programmes have most of the time [been] implemented in silos. The Team Europe Initiative might bring this collaboration and enhance linkages.”

staff from EU Delegation
### 2. OPERATIONALISING THIS ‘ONE EU’ APPROACH AT ALL LEVELS

#### 2.1 Upgrade coordination between EU and EU Member States at Headquarters level

<table>
<thead>
<tr>
<th>SELECTED FINDINGS AND LESSONS</th>
<th>ACTION POINTS</th>
</tr>
</thead>
<tbody>
<tr>
<td>Europe does <strong>not speak with one voice</strong> in strategic EU-supported partnerships on SAFS.</td>
<td>Foster <strong>synergies between diverse EU and EU Member States</strong> views and operational approaches to supporting SAFS transformation.</td>
</tr>
<tr>
<td>A mix of instruments and a variety of delivery modalities allows the EU to focus strategically on both country priorities and local needs.</td>
<td>Facilitate <strong>more strategic meetings</strong> of the Heads of Agriculture and Rural Development group to come to a common framework.</td>
</tr>
<tr>
<td><strong>Stakeholders’ capacity to network</strong>, share knowledge and learn from each other requires continuous support.</td>
<td></td>
</tr>
</tbody>
</table>

1 The Heads of Agriculture and Rural Development (HARD) group is one of the main informal mechanisms for coordinating actions on agri-food system transformation between the EU and EU Member States.

#### 2.2 Develop a common understanding on context-specific challenges and opportunities at country and regional level

<table>
<thead>
<tr>
<th>SELECTED FINDINGS AND LESSONS</th>
<th>ACTION POINTS</th>
</tr>
</thead>
<tbody>
<tr>
<td>EU support has often been based on <strong>partial sectoral analyses</strong>, limiting the ability to track SAFS system-level progress.</td>
<td>Promote <strong>multisectoral assessments</strong> to identify strategic entry points for supporting system level change.</td>
</tr>
<tr>
<td>Common results- <strong>monitoring frameworks</strong> building on a shared vision of EU, EU Member States, national governments and agri-food system stakeholders, enhance <strong>mutual accountability</strong>.</td>
<td>Develop a <strong>common understanding</strong> of how different sectors contribute or constrain SAFS transformation in a particular context.</td>
</tr>
<tr>
<td>The diverse and often <strong>competing interests of stakeholders</strong> are not taken sufficiently into account when planning and implementing.</td>
<td>Align <strong>monitoring frameworks</strong> and indicators with the needs and experiences of agri-food system stakeholders.</td>
</tr>
<tr>
<td><strong>Stakeholders’ capacity to network</strong>, share knowledge and learn from each other requires continuous support.</td>
<td>Strengthen the use of <strong>foresight and scenario studies and political economy analyses</strong> identifying ‘winners’ and ‘losers’ of change.</td>
</tr>
</tbody>
</table>

#### 2.3 Co-develop and empower Team Europe agri-food initiatives

<table>
<thead>
<tr>
<th>SELECTED FINDINGS AND LESSONS</th>
<th>ACTION POINTS</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Pooled funding</strong> can be an effective way to jointly implement interventions at country-level.</td>
<td>Build on the <strong>strengths of EU partners</strong> with a strong presence and track record in relevant global, regional and/or national arenas.</td>
</tr>
<tr>
<td>EU and EU Member States have not agreed on a <strong>common set of objectives and indicators</strong> to track progress on SAFS transformation.</td>
<td>Build on successful experiences with pooled funding at country level.</td>
</tr>
<tr>
<td><strong>Coordination amongst partners</strong> and synchronisation of support interventions are vitally important for promoting synergies and system level change.</td>
<td>Improve coordination between the <strong>Commission and EU Member States</strong> on partnership engagement with the Rome-based agencies.</td>
</tr>
<tr>
<td><strong>Lack of synchronised implementation</strong> can cause well-designed projects to struggle to interact, reinforce and learn from each other.</td>
<td></td>
</tr>
</tbody>
</table>

#### 2.4 Strengthen EU sustainable agri-food system diplomacy

<table>
<thead>
<tr>
<th>SELECTED FINDINGS AND LESSONS</th>
<th>ACTION POINTS</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Long-term partnership</strong> with national governments, implementing partners and other strategic partners is key to achieve lasting beneficial agri-food system-level effects.</td>
<td>Pursue stronger EU leadership in SAFS at the bi- and multilateral level, including by a common EU approach to partners like the UN Rome-Based agencies strengthened by more coordination within the EU’s DGs, and between EU Member States.</td>
</tr>
<tr>
<td>Support to SAFS transformation extends beyond development by including trade and investment themes, among others.</td>
<td>Leverage EU’s external action in international fora and institutions to ensure complementary and coherent support to SAFS.</td>
</tr>
<tr>
<td>«The EU plays an articulating role that can be strengthened with all the member states [...] to leverage funds from European financial instruments to strengthen finance actions for development, create infrastructure for agri-food markets, among others.»</td>
<td>Ensure compliance of European-based actors operating abroad with agreed principles and regulations.</td>
</tr>
<tr>
<td></td>
<td>Support stronger SAFS transformation leadership of European-based actors and partners abroad.</td>
</tr>
</tbody>
</table>
3. ENHANCING LEARNING AT EU, NATIONAL AND GLOBAL LEVEL

### 3.1 Intensify support for networking, experimenting and learning

**SELECTED FINDINGS AND LESSONS**
- The EU has positioned itself as a facilitator of inclusive international, regional, national and subnational agri-food system dialogues.
- Sizeable investments in information systems are required to assess progress and nurture policy dialogue at different levels.
- National research and innovation systems need to strengthen their focus on SAFS transformation.

**ACTION POINTS**
- Capitalise upon and systematically learn from relevant initiatives and experiences.
- Facilitate the development and provide incentives for the effective use of SAFS analytical approaches and assessment tools.
- Strengthen support to follow-up and scale relevant food system innovations by intensifying the investment in enabling policies, regulations, services, and practices.

### 3.2 Enhance local and broader participation in co-innovation processes

**SELECTED FINDINGS AND LESSONS**
- No single individual actor, government, government department or other institution has all the knowledge, resources, authority and governance mechanism to adequately ensure SAFS.
- Local agri-food system actors are important partners as sources of ideas, knowledge and initiatives for context- and needs-appropriate innovations.

**ACTION POINTS**
- Foster inclusive food system governance of innovation processes and promote multi-level governance, linking local, national and global governance structures and processes.
- Foster knowledge co-production on SAFS among stakeholders and ensure meaningful participation of smallholders, women and other food system entrepreneurs in innovation processes.
- Systematically mobilise local financial, research and advisory services.

### 3.3 Strengthen learning at EU level

**SELECTED FINDINGS AND LESSONS**
- Better coherence and coordination of learning opportunities and activities are required to foster mutual learning on SAFS.
- The EU has smartly used a mix of instruments and a variety of delivery modalities, and chosen implementing partners, national and/or international, based on their experience of working with national and local stakeholders across multiple themes.
- Newly introduced private sector instruments need to be adapted to local conditions and intended users.
- Sufficient access to relevant on-the-ground knowledge on SAFS is required to enhance learning.

**ACTION POINTS**
- Develop space for knowledge sharing, operational research, and on-the-job learning from Team Europe initiatives.
- Strengthen the focus of relevant Team Europe initiatives, and meetings of the HARD-group, to learn from the bottom-up programming instruments already developed by EU partners.
- Deepen the learning on how private sector instruments used by the EU, EU Member States and European financing institutions can better identify risk and success factors to effectively inform future programming.

> “You can only contribute to food systems if you have a proper understanding of the system, otherwise contribution is random.”
